F1200

Fixed Frequency Combined Up and Down Converter Unit

The **F1200** is a fixed frequency, fixed gain, combined L-Band Up and Downconverter. The **F1200** provides a low-cost solution for systems requiring conversion between 70MHz ±20MHz (or 140MHz ± 40MHz) and L-Band. The unit can be used to interface L-Band modems with 70/140MHz transceivers or 70/140MHz modems to L-band transceivers.

The unit has a highly stable internal reference source and will automatically detect and lock to an external 10MHz signal, when applied.

The standard F1200 L-band frequency is fixed at 1200MHz, for different frequencies please contact the factory.

Peak Features

- Compliant with IESS 306 and IESS 309 requirements.
- Used for 8PSK and 16QAM modulations in excess of 50Mbits/sec.
- Fully compatible with **RCU102** & **RCU202** 1+1 & 2+1 redundancy switch units.
- 10MHz external reference option fitted as standard with automatic internal reference back-up.
- Customising available.
